

DressCove Night System

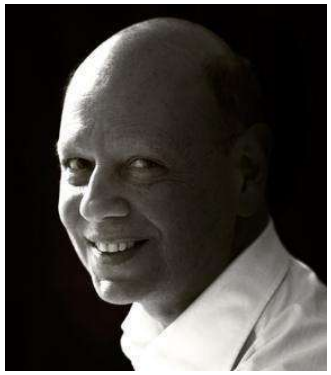

Design: Dante Bonuccelli

NEW FURNITURE CATEGORY

DressCove Night System | Design by Dante Bonuccelli

"The ideal design comes from a new concept, it is functional, pays attention to detail, has harmonious shapes and a timeless appeal.."

Dante Bonuccelli

Born in Buenos Aires where he graduated in Architecture in 1979, he moved to Milan in 1984 and began collaborating with several architectural firms.

In 1998, Dante Bonuccelli founded Avenue Architects, an architecture and industrial design studio with projects in Europe, Asia, America, and Australia.

Known for his ability to **blend minimalist design with functionality**, his style is characterized by **clean lines, a careful use of materials** and attention to detail to create elegant and functional spaces.

Among his main clients: Cartier, Dada, Domus, IBM, Molteni & C, Philips, UniFor, Schönbuch, and Sony.

DressCove Night System | Design by Dante Bonuccelli

A rigorous and **essential design that combines** the **technological and structural precision of aluminum** with the warmth, elegance, and quality of **handcrafted leather workmanship**.

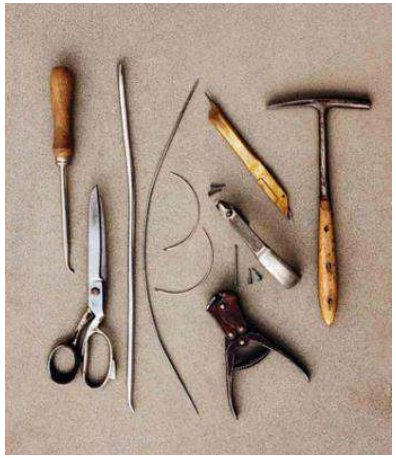

Leather craftsmanship with unique and distinctive references, drawn from the techniques used to cover the dashboards and seats of prestigious automobiles by the Interior In Motion unit of Poltrona Frau.

Organic shapes with tactile surfaces enhance the leather upholstery, which is combined with other materials such as wood or metal, to create bespoke solutions.

DressCove Night System | Design by Dante Bonuccelli

Key points

→ **A modular system for wardrobe and walk-in closet solutions**, offering a seamless integration of open and closed spaces, showcasing a uniquely distinctive design.

DressCove Night System | Typologies

Main features

→ DressCove is a modular system characterize by different supporting structures, allowing the creation of **typical wardrobe with doors** or **open walk-in closet solutions**.

→ The Container Panel System and the Container Upright System can be integrated.

Container Panel System

- Hinged Door
- Sliding Door*
- Open Unit

Container Upright System

- Hinged Door*
- Sliding Door
- Open Unit

Upright System

- Floor-ceiling*
- Floor-wall

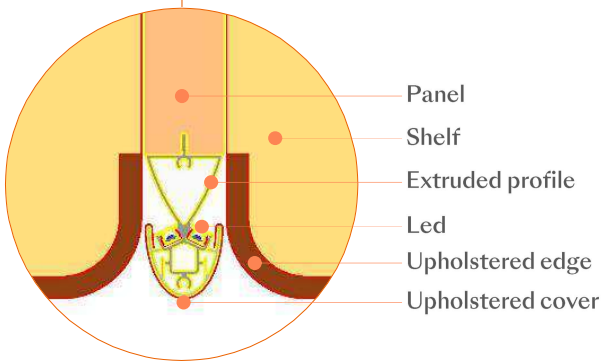

NOTES: *solution shown in the image.

DressCove Night System | Structural Features

Container Panel System

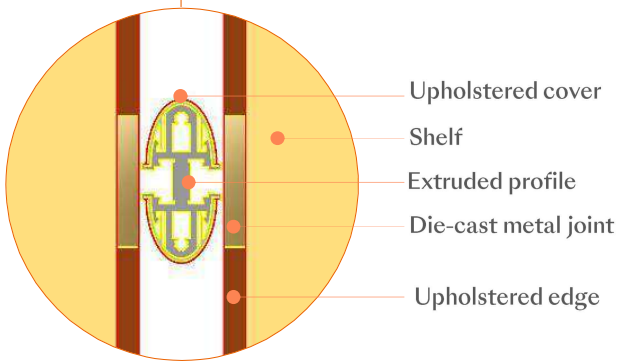

- → It's **based on a 35mm thick wooden panel** refined on the edge by an extruded aluminum profile in a semi-elliptical section, having a snap-on leather cover.
- → **The extruded profile contains 12V LED lighting devices**, directed onto the interior space.
- → **The shelves are fixed to the side panels using concealed systems** that ensure a clean interior.

Upright System

- → It's **based on an extruded structural aluminum profile** with elliptical shape, finished by two snap-on leather covers.
- → **The extruded profile supplies 12V electrification** to the lighting devices located beneath the shelves and drawers.
- → **The shelves and drawers are easily adjustable**, with no fixed positions, thanks to a custom-designed electrified metal joint.

NOTES: the structural solution of the uprights is identical in the "container upright system" solution.

DressCove Night System | Dimensions

Width*

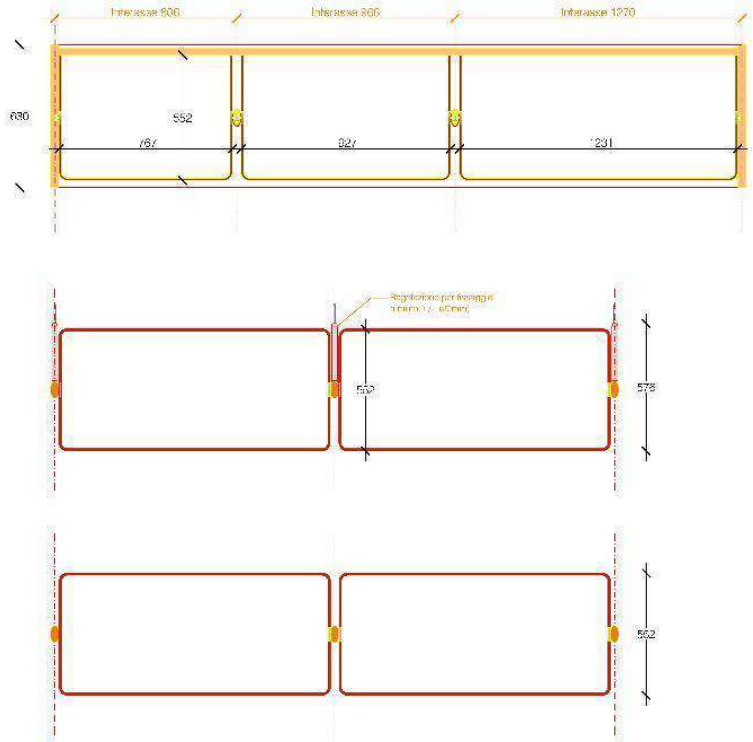

- Available in three interaxis: 806 – 966 – 1270 mm.
- These interaxes are shared by all systems: container panel system, container upright system and upright system, **allowing the integration of internal fitting elements**.
- **Customizable corner module** are available only for container systems.

Depth

- **630** mm for container panel system and container upright system, doors excluded. Mind to add +30 mm for the thickness of leather/wooden doors and +50 mm for the glass door (frame included)
- **552** mm for the floor-ceiling upright system.
- **572** mm for the floor-wall uphright sysetem.

Height*

- Four dimensions available: **2270** – **2430** – **2590** – **2910** mm
- **An additional dimension of 2700 mm** is available only for the floor –ceiling upright system, offered to accommodate the heights of European homes.

NOTES: *width and height are customizable and available for bespoke solutions.

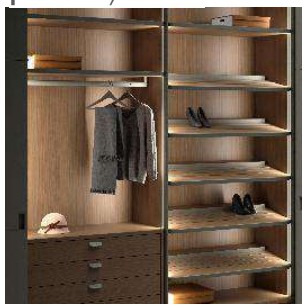

DressCove Night System | Shelves

Features

→ **The rounded edge design** has been carefully calibrated to match with the elliptical shape of the side panels and uprights, creating a seamless effect with the leather upholstery.

→ **The leather upholstery** can cover the entire shelf surface or the edge only. It offers a wide range of color combinations. This allows the creation of unique with "tailored" solutions that perfectly fit any space.

Container panel system

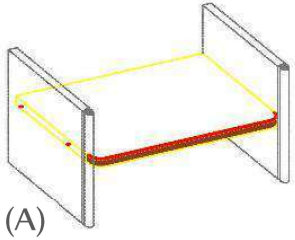

Container upright system

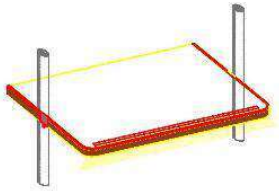

Upright system

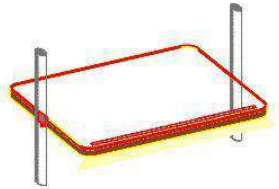

→ **A veneered or melamine-faced** shelf, always enriched on the edge with an aluminum profile leather covered. The leather edge is located only on the parts that are not in contact with the other components of the closet frame.

(A)

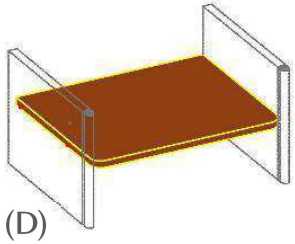

(B)

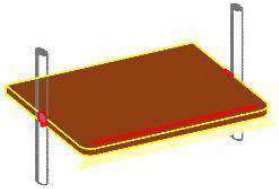

(C)

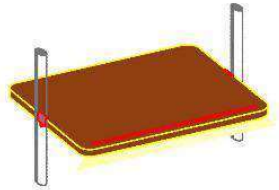

→ **A shelf upholstered in leather**, glued on the top surface and along the edge. The underside can be finished with leather covering, veneered, or melamine-faced.

(D)

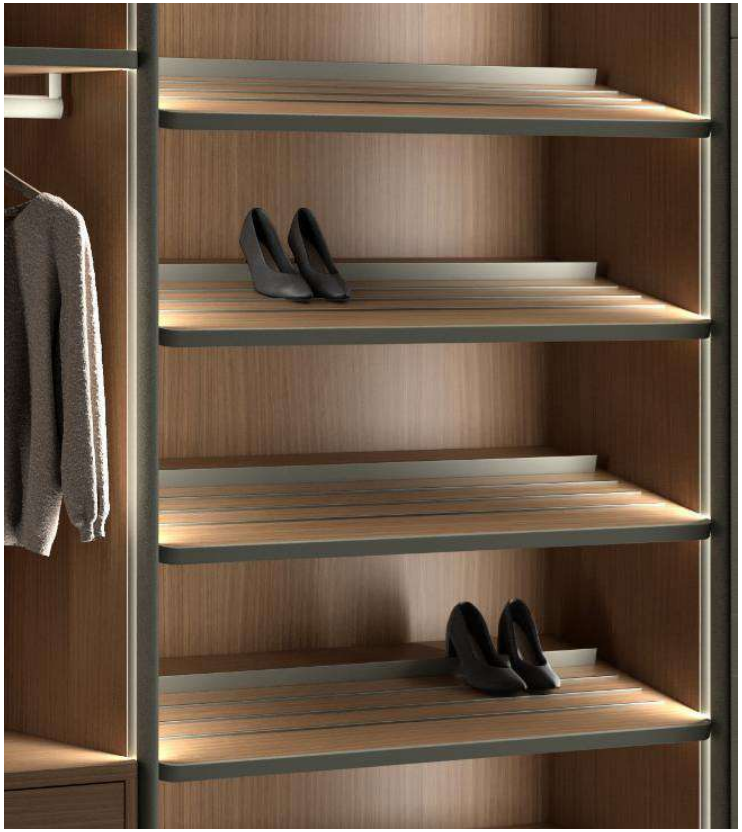

(E)

(F)

DressCove Night System | Shelves – Details and Accessories

Shoe racks

→ **Exclusively available with the panel system,** it features an inclined solution available in veneered or melamine-faced always with a leather edge.

→ **Coated aluminum profiles** run along the length of the shelf, securing the footwear in place.

Clothes rod

→ **Fixed to the underside of the shelf,** it integrates seamlessly with the design of the collection.

→ **An extruded aluminum profile** with an elliptical section leather covered is closed by two metal fixing pillars on each side.

→ **Scratch resistance is guaranteed by a metal surface** placed in the contact area with the hanger hook.

→ **Wood hangers** enriched with a stitched leather labeling are available in two finishes: Beech Wengé-stained and Canaletto Walnut.

DressCove Night System | Drawer Units

Main Features

→ **Suspended drawer unit** or **floor based** for the container panel system, only suspended for the container upright system and for the upright system

→ **The round edge design** of the structure matches with the round edge shelf solution. Side structural panels are available only veneered or melamine-faced.

→ **The top is available fully in leather, veneered, melamine-faces, or in glass.** The glass top features an extruded aluminum profile with integrated lighting and is combined with a removable tray finished with a 160 mm front panel.

→ **Drawer heights** are **80 – 160 – 320 mm**, available in numerous predefined combinations, creating drawer units for the panel and upright systems.

→ **Drawer unit structures** are made of wood, except for the 80 mm drawer, which is made with an extruded aluminum profile that forms a frame, customizable with either a glass bottom or removable trouser/skirt hangers.

→ **Fronts** are available in veneered, melamine-faced, or when in leather with a sharp-cut dyed edge and decorative perimeter stitching, which can be customized in tone-on-tone or contrasting colors.

→ **The handle** is always present on the drawers and stands out with leather upholstery, enriched by the Poltrona Frau logo heat-pressed.

→ **The interior** of the drawers can be enhanced with various exclusive solutions.
- Leather pad finished with tone-on-tone or contrasting perimeter stitching.
- Wooden divider veneerd with natural extra-light maple.
- Modular-boxes-set upholstered of leather and microfiber.

Suspended drawer unit

Floor based drawer unit

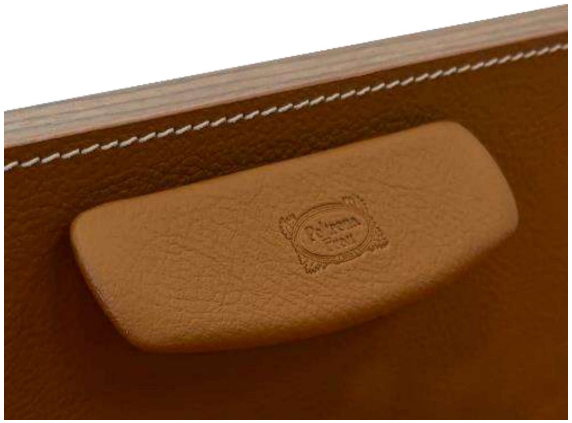

DressCove Night System | Drawer Units – Details and Accessories

Trouser and skirt hangers

- → **Made of a painted aluminum frame**, finished with an 80 mm front panel that seamlessly integrates it with the other drawers.
- → **A set of removable trouser and skirt hangers** are positioned within the frame

Handle

- → **The elegant shield-shaped form, upholstered in leather**, is made of metal with a light padding that softens the edges, making it pleasant to the touch.
- → **Poltrona Frau logo**, heat-pressed, completes the leather surface.

Modular-boxes-set

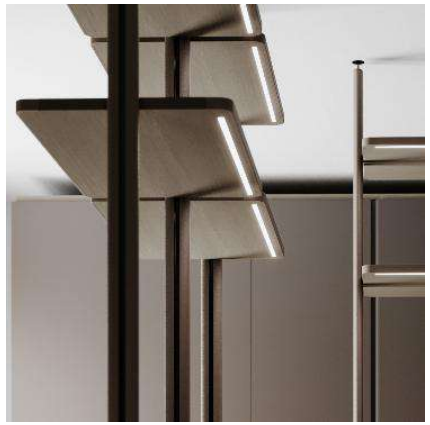

- → **A luxurious set of 6 boxes**, in various sizes and functions (watch holder, ring holder, etc.) is available for the interior organization of the drawers.
- → They are crafted with a wooden structure **leather covered** and finished internally with **lightly padded beige microfiber surfaces.**

DressCove Night System | Lighting

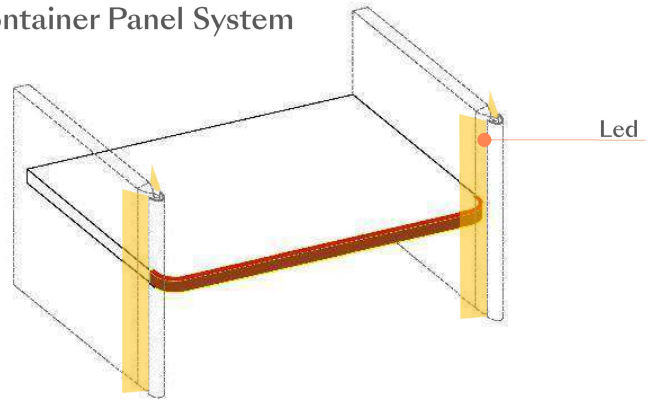

Main Features

- → **The optional 3000K LED** lighting is not just a functional detail, it's a feature that transforms the product into a setting.
- → **Lighting creates a scenic effect, enhancing the closet's structure** and finishes, and establishing a warm, welcoming atmosphere.
- → **The light is diffused through extruded aluminum profiles**, specially designed to direct the light source, **ensuring it is never directly visible.**
- → **Container Panel System**: Vertical diffused lighting from the leather-covered profile fixed on the edge of the panels
- → **Upright System** (container type or not): Horizontal diffused lighting from the underside of the shelf, ceiling panel, and drawers.

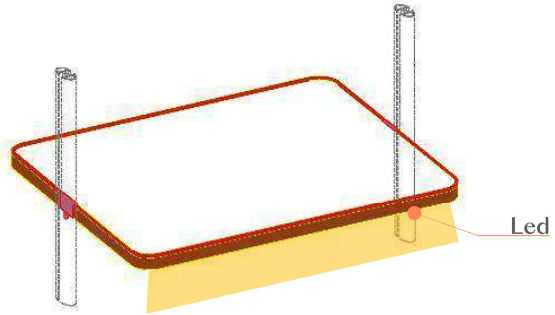

Container Panel System

Upright System (container type or free)

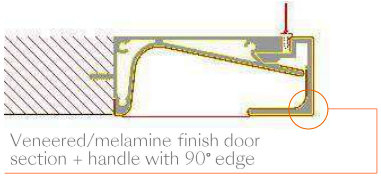

DressCove Night System | Doors

Hinged door opening

- → Leather covered
- → Veneered o melimine-faced
- → Glass door with leather covered frame

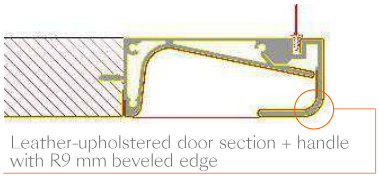

Veneered/melamine finish door section + handle with 90° edge

Sliding door opening

- → Leather covered
- → Veneered o melimin-faced

Leather-upholstered door section + handle with R9 mm beveled edge

Leather covered doors

- → Characterized by a **leather covering without visible stitching thread**, creating a graphic effect that highlights the essence of the leather. The design is different between the two door options:
  - Hinged: n.3 rectangular leather panels
  - Sliding: n.6 rectangular leather panels (as shown in the image)

- → **A coated metal profile** finishes the two ends of the leather-upholstered door, at the top and bottom.

- → **Available only with a recessed handle** made up of an extruded aluminum profile leather covered, finished with two coated metal profiles.

- → **A small 9 mm chamfer refines vertical edges**, enhancing the softness of the leather covering.

Veneered/melamine-faced doors

- → **A full-height handle** made from an extruded aluminum profile leather covered is fixed to the edge of the door.

- → **A coated metal profile** stops the two ends of the leather-covered handle, at the top and bottom.

- → **A single or double mirrored handle** (as shown in the image) is available, for hinged doors only.

DressCove Night System | Doors – Hinged Opening System

Glass door

Leather upholstered door

Main Features

→ **Only two hinges for the hinged door**, fixed to the base and ceiling panel, frees the doors from the traditional fixing system along vertical panels.

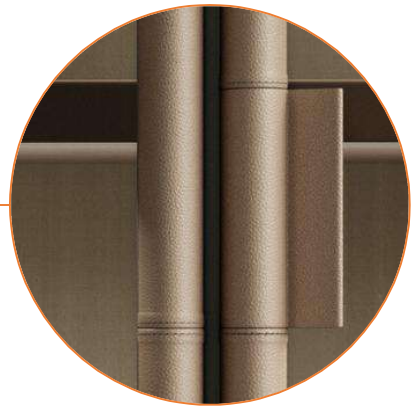

→ **It allows the configuration of innovative solution with uprights inside the structure,** along with the distinctive design of vertical partition paneling with the half-elliptical leather covered edge.

→ **It allows a greater usability of the inner space**, which is especially visible in the upright solution, where the traditional division of the panels disappears.

DressCove Night System | Glass Doors

Main Features

- → **Bronzed glass door** available for hinged openings.
- → **Elegant and light**, it reaches up to a maximum height of 2910 mm.
- → **The frame is made of extruded aluminum,** with vertical sides featuring a semi-elliptical section covered in leather and horizontal sides with a rectangular coated tubular section.
- → **An exclusive hinge** is integrated within the frame, designed specifically for the DressCove System.
- → **It opens up to 170° with a soft-close mechanism.**
- → **120 mm high blade shape handle, upholstered in leather** is fully integrated into the vertical profile.
- → **Decorative stitching, available in tone-on-tone or contrasting colors,** neatly finishes the vertical profiles with a regular stitch pattern.

DressCove Night System | Walk-in-Closet Solutions

Container Upright System

Main Features

→ The **walk in-closet solution best expresses the concept of the project**, to offer an elegant, warm and refined environment in which **you can feel enveloped by the brand experience**.

→ Both the **Container Upright System** and the **Upright System** are **designed to furnish walk in closet solutions**.

→ **The Upright System frees the wardrobe from traditional containing structures**, with two possible configurations, it can be fixed from floor-to-ceiling or from floor-to-wall, **transforming the bedroom into a contemporary space of elegance and functionality.**

→ **It gives greater freedom in space organization**, ensuring better visibility and accessibility to clothing and accessories.
